

Using your .coop name for your website & emails

A .coop domain can tell your customers about your values in an instant. Thankfully you can setup your existing website with a .coop domain in an instant too!

If you already have a website that you would like to become a .coop, we offer a 'Domain Forwarding' service that allows those entering your .coop domain in their browser to be sent directly to your existing website. Plus 'URL Masking' allows the .coop domain to stay in the browser window as they navigate around your website.

This free service can be accessed via your domains.coop customer control panel:

<http://manage.na.domains.coop/customer>. Once logged on, jump to your .coop domain and click on the 'Manage Domain Forwarding' link. Enter the web address of your existing website in the text box provided and hit 'Save'. Further information can be found on our KnowledgeBase:

<http://manage.na.domains.coop/kb/servlet/KBServlet/faq1494.html>.

And if you need any help at all contact our dedicated support team: support@domains.coop.
